REPORT OF THE TRUSTEES

To His Excellency the Governor and the Honorable Council.

The trustees of the Westborough State Hospital present this, their forty-second report.

"The work of renovation goes on. Each year some portions of the hospital show so much of wear and tear that repair becomes imperative. This year, a brick building, adjoining the main building, has been renewed after forty years of hard usage. Across the lake, the frame building, known as Richmond Colony, has been so changed that the interior looks like new. Not far from it are the new dining room and corridors connecting it with the two buildings, designated as Speare and Dewson buildings, making a satisfactory unit for one hundred and twenty-four patients. The Durfee Colony, high on the hillside to the north of the main building, has been modernized in the interior, and now the outside of the frame building looks old and out of harmony with the inside. The main kitchen has a newly tiled floor, which is superior to the old floor of black asphalt. On the slope in front of the main building, is the old frame farm house, the interior dismantled in readiness for the reconstruction, which will provide accommodations for four physicians and their families. When finished and occupied, these apartments will be of much value to the hospital in satisfying the natural desire for privacy and individuality of home life. The lack of such accommodations in the past has caused some of our valuable physicians to resign and go where these needs could be supplied.

Good results show for the work done on the grounds and gardens, although considerable damage was done to some of the crops by the birds. The occupational therapy room is a busy and attractive place with its men and women workers, some of whom use their previously acquired skill and others give expression to hitherto unrecognized artistic ability. Their acts as well as their words prove that accomplishment is more satisfying than inactivity, and the instructors find many men and women who produce useful and attractive furnishings and decorations while remaining on their own wards."

"The specialists, who are members of the Consulting Board of Physicians and Surgeons and the Visiting Staff, have given freely of their time and skill to certain of our patients; and again as in former years, we express our gratitude for the uncompensated services they are rendering. A summary of their work will be found elsewhere."

We hope that money may be appropriated for the purchase of a small property at the entrance to the hospital grounds.

We realize the need of a garage large enough to shelter the automobiles.

"The nursing problem needs to be solved. Our quota is never filled, the number in the training school is almost negligible. It is desirable that all those caring for patients should be in training or should be graduates. We hope those in authority will find a way to make instruction in the training school attractive to all those caring for the inmates of a State hospital.

On the morrow, December first, will be the fortieth anniversary of the opening of this hospital by proclamation of Governor Robinson. During these four decades, much of the original construction and finishing has been worn out and renewed. New units have been built from time to time, and the hospital has grown to accommodate about fourteen hundred patients. Certain inventions have simplified and assisted in the management, and other developments have helped in the treatment of the patients. While much remains to be learned before a much larger proportion of insane persons can be restored to their previous normal condition

we believe that when the age of this institution is doubled the discoveries in the hospitals and research laboratories will cure and prevent so much of insanity that some of the present institutions for defective and disordered minds will be discontinued and will be used for other and happier purposes."

We appreciate the faithful work by the physicians, the treasurer, the steward, the engineer, the farmer, the supervisors and nurses and all the many other employees whom we cannot mention here, and we thank them.

We wish finally to make public our confidence in the superintendent Dr. Lang, and to hope that he may continue to carry his great responsibility with as much success as in the past.

REPORT OF THE SUPERINTENDENT

To the Board of Trustees of the Westborough State Hospital.

The following is the forty-first Annual Report of the Superintendent of the Westborough State Hospital and it is submitted for your consideration. The statistics are for the year terminating September 30, 1926 and all other matter for the period ending November 30, 1926.

MOVEMENT OF PATIENT POPULATION

There were in the Hospital at the end of the statistical year 581 male and 823 female patients, a total of 1404. Absent from the Hospital but still on our books, there were 14 in family care; 104 male and 116 female on visit or escape, a total of 220; making a grand total under the care of the Hospital of 1638. The admissions during the year number 454, of which 330 were first admissions, 102 re-admissions, and 18 persons received by transfer from other hospitals under the jurisdiction of the Department of Mental Diseases. The daily average number on the books was 1610.22, and actually in the Hospital 1368.54. For the fiscal year the daily average number of patients actually resident in the Hospital was 1376.88 which figure is used in connection with such parts of this report as are concerned with financial matters. The total number of patients discharged was 420, of which number 168 died, 7 were transferred to other hospitals, 37 were unimproved, 115 improved, 74 recovered, and 19 discharged as not insane. Of the last mentioned group, 3 were voluntary patients, 14 were committed for temporary care or observation, and 2 as insane. The whole number under the care of the Hospital during the year was 2058.

FIRST ADMISSIONS

The number admitted to a hospital for the insane for the first time was 330; 312 were insane and 18 were sent for either temporary care or observation and not subsequently committed for an indefinite period. Of the 312 insane, 17 or 5.45 per cent were diagnosed as senile psychosis, and 32 or 26.28 per cent were suffering from psychosis due to cerebral arteriosclerosis, making a total of 31.7 per cent of the first admissions whose mental trouble was due to cerebral changes incident to old age.

There were 13 patients or 4.16 per cent afflicted with general paralysis of the insane, an extraordinarily low percentage when compared with the average of 8.35 per cent for the five previous years.

Alcoholic indulgence was found to be the cause of the mental illness in 17 cases or 5.45 per cent, this being an increase of 0.84 per cent over last year's figures but a decrease of 3.45 per cent from the average of ten years prior to 1919.

There were 37 cases of manic-depressive psychosis, of which 10 were of the manic, 26 of the depressed, and 1 of the mixed type of the disease. These comprised 11.86 per cent of the first admissions.

Dementia praecox was found in 105 case or 33.65 per cent. Of these, 24 were of the paranoid, 48 of the catatonic, 22 of the hebephrenic, 3 of the simple type, and 8 type undiagnosed.

Three were received suffered from epileptic psychosis, 2 from psychoneurosis, 2 from psychosis with psychopathic personality, 2 from involution melancholia, 7 from psychosis with mental deficiency, 4 from psychosis with brain disease other than tumor and arteriosclerosis, 4 from psychosis associated with somatic disease, 1 from psychopathic personality without psychosis, 1 from mental deficiency without psychosis, 1 with psychosis due to drugs, and in 14 cases the diagnosis had not been made at the end of the year.

NATIVITY OF FIRST ADMISSIONS

Of the first admissions, 34.29 per cent were aliens by birth, and 75.32 per cent were of alien parentage on one or both sides. The latter figure is an increase of 1.16 per cent over that of last year.

AGE OF FIRST ADMISSIONS

Fifty of those admitted were more than 70 years of age, 51 from 60 to 69, making a total of 32.27 per cent over 60 years of age; 46 were in the sixth; 40 in the fifth; 61 in the fourth; and 48 in the third decade of life; 16 were less than twenty years of age.

READMISSIONS

Readmissions exclude all persons who have previously been admitted to this or any other hospital for mental trouble. Of these there were received 106, of whom 89 were insane, 4 were voluntary sane, and 13 were sent for either temporary care or observation. Of the insane, 44 were suffering from dementia praecox, 22 from manic-depressive psychosis, 6 from psychosis with cerebral arteriosclerosis, 3 from psychosis with mental deficiency, 3 with general paralysis of the insane, 3 from involution melancholia, 1 from alcoholic psychosis, 1 from senile psychosis, 1 from epileptic psychosis, and 5 cases had not been diagnosed at the end of the statistical year.

DEATHS

There were 168 persons who died at the Hospital during the year, this being 8.16 per cent of the total number under treatment. This is an increase of 15 over the number who died last year and may be explained by the fact that there is a very large number of persons in the Hospital who have been here many years, are aged and infirm, and by the fact that there is a constantly increasing number of persons of this class now being admitted who were formerly cared for at home. Our records show that in the Hospital at the present time we have 4 patients who have been here over 40 years, 26 over 30 years, and 83 over 20 years. The cause of death in 77 cases was cerebral arteriosclerosis, in most cases accompanied by apoplexy or chronic myocarditis; general paralysis of the insane was the cause of death in 19 cases; cardio-vascular disease other than arteriosclerosis in 37; broncho-pneumonia in 7; lobar pneumonia in 9; tuberculosis of the lungs in 5; diseases of the stomach and intestines in 2; and the remainder from various causes as shown on statistical table number 16.

Of those who died, 106 were over 60 years of age, 26 between 50 and 60; 15 between 40 and 50; 13 between 30 and 40; and 4 under 30 years of age.

DISCHARGES

The total number discharged during the year was 245, this being 74.24 per cent of the number of first admissions. Of this number, 74 had recovered, 115 were much improved, 37 were unimproved, and 19 were not insane.

MAINTENANCE

The total amount expended for maintenance for the hospital for the fiscal year was \$533,043.00, this being \$5,580.75 less than the sum expended for the same purpose during the previous year. The weekly gross per capita cost was \$7.445 and its distribution and comparison with previous years is shown in the table below. The weekly per capita income was \$2.393 and the net weekly per capita cost was therefor \$5.052.

	Weekly per Capita 1921	Weekly per Capita 1922	Weekly per Capita 1923	Weekly per Capita 1924	Weekly per Capita 1925	Weekly per Capita 1926

SPECIAL APPROPRIATIONS

Four special appropriations became available during the year.

The sum of \$10,000 was appropriated for remodeling the building known as the Farm House to make four apartments for physicians who had been so badly quartered in the past that many had left the service who otherwise would have remained. Work is progressing rapidly on this project and it is expected that the building will be ready for occupancy early in the summer.

The sum of \$17,500 was appropriated for the renovation of female wards 7, 8, 9, and 10. Plans have been prepared, much material has been purchased, and a beginning has been made on the project.

The sum of \$12,000 was appropriated for the enlargement of wards 1 and 4 at Durfee Colony and for providing new and modern water sections. Plans have been prepared, orders placed, but little work has yet been done.

The sum of \$5,000 was provided for the installation of a continuous bath section in connection with the West Wing in order that patients there located might have the advantage of this type of treatment. The work is well under way and will be completed early in the spring.

Of the special appropriations of previous years, the following may be said:

Cottage A, B, and C have been completed, furnished and occupied, and found to be very satisfactory indeed.

The West Wing porch has been finished, has been used to some extent and with the advent of warm weather will come into its full usefulness. It is a splendid and permanent addition to the building.

From the appropriation of \$12,000 for fire protection, much work has been done in the attics of the female wards in connecting up flues with outlets through the roof and in connection with this ten tons of sheet metal have been used. Fire walls have been built, self-closing doors installed, and a sprinkling system for the laundry has been ordered and will be installed in the near future.

REPAIRS AND RENEWALS

A large new refrigeration box with automatic compressor was installed in the main kitchen and has been very satisfactory; window lifting devices were provided

for the windows in the main kitchen; tile floors were laid in the West Wing dining rooms; a new six-inch steam line was laid in the tunnel between the main group and the power house; extensive repairs were made to the pipe threading machine, and fire alarm system; the ammonia compressor was thoroughly overhauled; much wiring was placed in conduit; a new tar and gravel roof was placed on the power house; the following new dairy equipment was purchased; 1 Burrell Simplex Spray Vat Pasteurizer, 1 Simplex Cooler, 1 Wright-Zeigler motor-driven combination milk and brine pump, 1 Wright-Zeigler brine maker, together with pipe and fittings; a new brine ice cream freezer was purchased; changes were made in the electrical lines requiring three new 15 K.W. transformers; and new five-inch valves for the steam lines and Hoffman valves for the heating system were purchased and placed in use; a portable track and one-ton cars for conveying coal from its point of storage to the boiler front and new track and scales were put in use and found to be satisfactory.

REPAIRS ORDINARY

Much credit is due to the engineering and mechanic personnel for the large amount of work accomplished during the year. The motors and machinery in the laundry were re-arranged and a new dryer and starcher installed; standpipe and hose were provided adjacent to the congregate dining room and auditorium, and in the storeroom and basements of female wards 1 and 2 and male wards 1 and 2; the plumbing and heating were completed in the Cottage; dish washers and sinks were installed at both Richmond and Durfee Colonies; the plumbing was renewed in Richmond Sanitarium and a new tin roof provided on the central portion of that building; the morgue was overhauled, a new tile floor installed, new autopsy table provided, and the building otherwise made modern and suitable for its uses; new white enamel sinks were provided in the West Wing dining rooms; the old plumbing was removed and new roughed-in in the Farm House; in the transformer house a double throw high tension switch connecting both high tension lines from the power house to a double set of bus bars was wired and a double throw switch on the switch board at the power house makes it possible to use commercial power from either set of bus bars. The remodeling of Richmond kitchen and dining room was completed, this involving much work for the carpenters and painters; in the West Wing several old sliding doors were replaced by metal covered swinging doors; the sanitarium building at Richmond Colony was thoroughly overhauled; the large doors on the second floor were removed and windows installed; plaster was renewed and the whole painted and linoleum provided for the floors. A new telephone switch board was installed in a new location and the old booth removed, the space it occupied reverting to office use for which purpose it was much needed; new cement sidewalks were built connecting the rear of the Cottage with other walks of the same type; a concrete walk was provided at the west of the laundry connecting the two laundry buildings. Much other general job work was done, keeping fully occupied the time of carpenters, mechanics and painters.

SPECIAL APPROPRIATIONS REQUESTED FOR 1927

For 1927 special appropriations were requested for the following purposes:

For the purchase of a plot of land opposite the main gate \$7,000; for building a new horse barn at Heath Farm, the cost to be determined by the Department; for garage for the accommodation of 14 vehicles \$5,000; for fencing and sheds for salvage yard \$4,000.

REPAIRS AND RENEWALS REQUESTED FOR 1927

For 1927 the following items were requested for repairs and renewals:

Bakery equipment to cost \$1,715; laundry equipment \$686; kitchen equipment \$2,901; stone crusher \$3,600; painting standpipe on Durfee hill \$700; a new boiler feed pump \$994; hand stokers for power house \$1,205; repair to oil switches \$100;

hot water tanks \$650; retubing boiler at Richmond Colony \$750; rebuilding boiler walls at power house \$1,751; Smith mouth pieces \$210; renewal of copper gutters, main group, \$2,000; repairs to pole line to Metropolitan pumping station \$750; improvements to the sewerage system \$297; new locks for the wards to complete the new master key system \$1,000; replace sliding doors \$215; general repairs at Durfee Colony \$580; repairs to brine tanks \$322; general repairs to Stanley Annex \$377; new entrance to Administration Building \$1,285; copper wire screening \$500; general repairs to horse barn \$270; to the silo \$258; to the fruit cellar \$238; to the tool shed \$33; alterations to the second floor of Administration Building to provide a new dining room \$1,200; additions to the coal railway \$1,486; repairs to fire alarm system \$700; painting \$1,650; wiring in conduit \$530; a total of \$28,953.

CHANGES IN PERSONNEL

The only change in the personnel of the Medical Staff was the appointment of Dr. Ronald B. McIntosh to the position of assistant physician on July 1, 1926. Dr. McIntosh is a graduate of Boston University School of Medicine and was interne at the Massachusetts Homeopathic Hospital.

MEDICAL SERVICE

As always in the past our consultants have given us splendid service both in making routine visits and in special trips for surgical work and other emergencies. Forty-seven visits to the Hospital were made, 489 patients were examined, 27 operations were performed, and consultations were held and advice given by telephone in many other instances.

The customary staff meetings have been held at which recently admitted patients were presented for diagnosis, prognosis, and treatment, and other cases for consideration as to the advisability of releasing them from the Hospital on visit. Many of the meetings were held on the admission wards.

Supervision of the wards has followed along the usual lines. Newly admitted patients are given bed care following complete physical examination; hydrotherapeutic treatment is used widely and medicines and diets in cases requiring them; early interest in occupation is encouraged and ward classes in occupational therapy are found useful for patients not yet ready to leave the ward to attend classes in the occupational room or to engage in other activities of the Hospital. The summer camp was enjoyed as usual during July, August and half of September.

"Laboratory Service.—The clinical and pathological laboratory has been very active, and much interesting material has been obtained for study. The most noteworthy case of the year was that of a man of 58 years who died after a little more than ten weeks residence in the Hospital. He had suffered some minor injuries prior to admission and while here was confused, disoriented, and excited and exhibited an irregular temperature curve and high leucocyte count. Autopsy revealed sub-acute vegetative endocarditis and an abscess in the wall of the left ventricle.

In June a basal metabolism apparatus was purchased, the Roth modification of the Collins-Benedict machine being chosen. It is equipped with a kymograph by means of which a permanent graphic record can be obtained of each test. A series of endocrine studies is in progress, these including a determination of vital capacity by the Dreyer's method, alveolar carbon dioxide by the method of Fredericia, a careful chemical analysis of the blood, and an accurate analysis of the twenty-four hour excretion of urine. An endocrine imbalance has been found in some cases of dementia praecox of the catatonic type and it is believed that the extended study of a group of these cases may bring forth much of interest." The following is a list of the general work done by the laboratory during the year: Analyses, gastric content, 9; autopsies 31; basal metabolism tests 71; blood counts; red blood 212, white blood 251, haemoglobin percentage 216, differential count 251, hydrogen-ion determination 5; blood chemistry: creatinino 55, nitrogen total 166, sugar 171,

uric acid 26, cultures 2, urea 62, cultures 30; feces 4; photographs 7; renal function tests 4; sections stained 244; slides stained 100; smears, bacterial, 216; spinal fluid examinations: cytological count 26, albumin content 26, globulin content 24, colloidal gold curve 26, sugar content 2; sputum examinations 48; syphilitic treatments: 586 doses of arsphenamine, 296 doses of mercury; tissue specimens 10; tissues cut 134; tissues cut and stained 11; urinalyses, routine, 1280; urinalyses, 24-hour; urea 27; creatinine 20; total nitrogen 20, uric acid 20, ammonia 17, sugar 1; vaccines 1; vital capacity 21; Wassermanns 461; Widal tests 5.

"General paralysis of the insane and syphilis in other cases has been vigorously treated by the use of arsphenamine intravenously, salicylate of mercury intramuscularly, and potassium iodid by mouth. A few patients from the community are referred by physicians or social agencies and are treated without charge. The treatment outlined above has given very satisfactory results in many cases and unquestionably retards the course of the disease and in many instances apparently brings about a remission. Over a period of seven years a large number of cases have been treated and a study is being begun with a view of comparing the results with those obtained from the use of plasmodium of malaria and if the latter treatment seems to be more efficacious, it will be adopted."

Dental Service:—The dentist and dental nurse have been kept constantly at work in caring for the mouths and teeth of our patients. Extractions, scaling and cleaning, and ordinary fillings are done in all cases at the expense of the Hospital. Where work of more expensive types is desired, it is also done if the relatives wish to bear the expense. Following is a list of the work accomplished during the year: Bridges set and fitted 39; bridges removed and cleaned 44; crowns set and reset 47; crowns removed 1; cleaning and scaling 1707; examinations and charting 1435; extractions 1135; filling teeth 173; fillings: amalgam 720, cement 653, synthetic 625, temporary 502; plates: impression, bite and shade, 16, cleaned 653, fitted and filed 174, repaired 42; treatment of gums 1454, oil of clove 403; X-rays taken 150; number of patients with work completed 777; number of visits 3546.

Psychiatric Out-Patient Department:—The usual weekly clinic at the Out-Patient Department of the Massachusetts Homoeopathic Hospital in Boston has been held on each Tuesday during the year, and in addition to these, a clinic has been held once monthly in the evening at Framingham and Marlboro where patients on visit in those districts may report. Cases referred by physicians and social agencies in the community are also seen and examined at these clinics. A social worker attends all clinics and does much in assisting the patients in adjusting themselves to their environment, in the straightening out of domestic difficulties, and in some cases in obtaining employment.

Examination of School Children:—The examination of school children in the School Clinics has been carried on and such work is now under way in the town of Westborough.

Instruction of Students:—The junior class of the Boston University School of Medicine visited the hospital for clinic work and had an opportunity to observe the operations of various parts of the institution with special reference to care and treatment of patients.

Physiotherapy Department:—The X-ray for surgical, medical and dental diagnosis is freely used. A new Campbell high frequency coil and a Thompson-Plaster deep therapy lamp were purchased and found to be very useful in treating certain physical conditions. D'Arsonval current has been used in the treatment of high blood pressure in cases of arteriosclerosis with gratifying results in many instances. Diathermy, vacuum tube therapy, baking, massage, and superficial X-ray therapy have been found helpful in a variety of conditions. In the first month of the year 56 treatments were given and in the last month the number had increased to 252.

Training School for Nurses:—More and more difficulty is being met in obtaining suitable candidates for most schools of nursing and ours is no exception. The classes are small and because of the extent and difficulties of the course, many become discouraged and drop out or for one reason or another are separated from the service. Affiliation with the Massachusetts Homeopathic Hospital continues as formerly.

INDUSTRIES

Male Industrial Room:—This department has continued its usual activities during the year and has produced the following: brooms 823; chairs caned 118; chairs upholstered 34; laundry bags made 61; mattresses made 276; renovated 261; canvas mattresses made 14; pillows made 255; renovated 324.

Tailor Shop:—The tailor shop has done much toward the saving of clothing which except for this attention would have been discarded, and by cleaning and pressing has resulted in the distinct saving of money which otherwise would have been spent for clothing. The following work was done: cleaned and pressed: coats 511, suit, 45, trousers 444, vests 236. Repaired and mended: coats 335, overcoats 37, pillow slips 107, sheets 164, shirts 174, stockings 546, trousers 233, underwear 321, vests 81.

Shoe Shop:—The repair of shoes has continued, there having been 752 pairs of shoes tapped, 64 pairs heeled, 622 pairs of vamps repaired, 657 rubber heels applied, and 339 pairs of heels reversed.

Furniture Shop:—The out-put of the furniture shop has lessened during the year due to the fact that the person employed left the service and it was necessary to discontinue work until the position was filled. The following are the articles manufactured and repaired: manufactured: book cases 1, chairs 129, picture frames 2, tables 27. Repaired: bed screens 6, bedside tables 8, bureaus 22, chairs 335, Christmas tree bases 24, clocks 23, commodes 4, fireplaces, wooden, 8, frames 19, mirrors 2, rug frames 7, settees 4, step ladders 1, tables 47, towel racks 1, victrolas 2, warping frames 1. Main Room: art squares, chenille, 1; bags, burlap, with Swedish darning, 1; bags, laundry, 49; baskets, of reed, raffia, pine needles, and rustic, 26; baskets, painted, decorated and repaired, 18; bedspreads, embroidered, 2; bobbin lace, 13 yards; book ends made 4; carved and decorated 16; bottles decorated 3; boxes painted and decorated 16; blotter pads made 4; broom racks 1; card case holders 4; center pieces crocheted 2; chair backs, lace, crocheted and Reticelli work, 5; couch covers 3; crepe paper flowers 45; curtains made of muslin, burlap, gingham, cretonne and scrim, some with stencilling, drawn work, hemstitching and crocheted edges, 337 pairs; curtain pulls 29; curtain tops, wooden; 3; doilies 27; door stops made and decorated 14; dresser sets of Reticelli work 1; face cloths knitted 24; fire screens painted 1; flower stands of reed 4; foot stools caned 1; refinished 2; jardinieres of reed, tin and marble paper, 27; lace crocheted 50 yards; lamp shades, bound, covered, painted, 3; luncheon sets embroidered 4, mats 2; oil paintings 1; panels painted 5; piano cover 1; piano stool cover 1; pictures, painted, framed and tapestry needle-point, 29; pillows, of burlap, muslin, linen, felt, tapestry work, needlepoint, woven and embroidered; 80; plaques carved and decorated 7; plain sewing: aprons 42; dust cloths 48; napkins 36; pillow cases 721; sheets 1789; towels 843; pottery bowl and pitcher painted 2; programs decorated with spatter work 397; programs decorated and tied 1800; purse of tooled leather 1; rugs, braided, hooked, spool knit, rag, woven, old fashioned tied in, and chenille, 66; runners of burlap and muslin, embroidered and cretonne trim, crocheted ends, Italian hemstitching, Russian drawnwork, Swedish darning, and woven, 112; screen covers of muslin 20; of burlap 3; screens painted 1; stockings mended 1005 pairs; signs made and decorated 3; table covers, of raffia, muslin, linen and woven, embroidered, painted and cross stitch, 50, telephone screens 6; tie backs for curtains 130; tin cans decorated with wall paper 20; tool box made 1; towels hemstitched 12; tracker woven 1; tray cloths, hemstitched and Swedish

darning, 32; vases decorated with sealing wax 5; wall hanging, crayon work, 3; window cards 3.

Work accomplished on wards: aprons made 124; bags of raffia and net, 7; baskets of reed and raffia 5; bed spreads 2; book ends 2; boxes decorated 11; boot jack 1; boxes carved 1; chairs caned 12; checker boards 11; checker sets 3; checker board covers of burlap 8; couch covers 2; curtains of scrim, cretonne, gingham, Turkish towelling, and muslin, some hemstitched and stencilled, 53; doilies, crocheted and tatted, 35; domino sets 7; door stops 2; dust cloths 450; face cloths 2; foot stools 1; jardinieres of reed 2; lamp shades 5; lanterns decorated 9; laundry bags 14; muffin stands 1; piano cover, hemstitched and painted, 1; pillow covers 5; pillow slips 1712; rugs, braided, crocheted, hooked, knitted, stitched, old fashioned, tied in and woven, 44; table scarfs, embroidered, crocheted, stencilled, hemstitched 91; tapestry pieces 4; trays of reed 1; wall hangings decorated and embroidered, 6; window shades of cretonne 5; and plain sewing: pillow slips 1712, sheets 3342; towels 310.

During the summer for a portion of the day patients in this department have assisted in picking fruit and vegetables, in the shelling of peas, the stringing of beans, and the preparation of farm products for canning, pickling, etc.

FARM

The farm year was somewhat better than the average. Had rain been a little more plentiful the garden crops would have been more productive. Winter squash was too dry while setting and in consequence the crop was small. Humid conditions were responsible for a loss on late planted turnips, this being just the condition to favor the spread of blight. Ensilage corn matured well and there is a good supply of excellent ensilage. The corn harvester and ensilage cutter were very efficient and saved much time and effort in filling the silos. Potatoes were of excellent quality, the yield being about the same as last year.

Pork production was greater than for some years, there having been produced nearly 69,000 pounds. The herd did well, the cows averaging 10,251 pounds of milk for the year. Heifers that freshened made a very creditable showing. There was a new junior herd sire purchased during the summer. Young stock is making satisfactory gains and we look for more high producers. The herd continues to be free from tuberculosis. Our dairy has been overhauled and new pasteurizing equipment installed. There was an average crop of fruit, one orchard producing its first crop this season and the yield was much larger than expected. Detail of the farm production is as follows:

Asparagus 1941 pounds, string beans 9292 pounds, shell beans 826 pounds, beets 40825 pounds, carrots 45940 pounds, cabbage 46275 pounds, cauliflower 875 pounds, celery 4710 pounds, chard 11315 pounds, sweet corn 28912 pounds, cucumbers 15524 pounds, dandelions 612 pounds, early lettuce 1340 pounds, late lettuce 9640 pounds, mangels 47035 pounds, onions 26149 pounds, parsnips 32580 pounds, green peas 2568 pounds, peppers 800 pounds, parsley 100 pounds, radishes 912 pounds, rhubarb 12425 pounds, spinach 4037 pounds, winter squash 8325 pounds, summer squash 4848 pounds, brussel sprouts 555 pounds, tomatoes 65364 pounds, turnips 22805 pounds, ensilage 425.3 tons; hay 202.8 tons; green hay 86.25 tons; rowen 19.75 tons; meadow hay 5 tons; potatoes, early, 27635 pounds, potatoes, late, 135565 pounds, pork 68744 pounds, beef 17897 pounds, mutton 255 pounds, veal 88 pounds, liver 2110 pounds, apples No. 1 66642 pounds, apples No. 2 7728 pounds, grapes 175 pounds, pears 1070 pounds, peaches 408 pounds, strawberries 1609 boxes, milk 249930 quarts.

GROUNDS

Roads, walks, lawns and flower beds received the usual attention and many additions were made to shrubbery and flower beds. The greenhouse and outside

garden produced a profusion of flowers of finest quality and there were distributed to various parts of the Hospital 5670 potted plants and 3683 bouquets. There was also raised 4958 plants for outside flower beds and 114 bushels of vegetables.

ENTERTAINMENT

Entertainment for patients has a definite therapeutetic value. During the winter months moving pictures on Friday afternoon and evening give enjoyment to a large number and are very popular with all classes of patients. Tuesday evening dances have been continued, the music being furnished by the hospital orchestra. They are well attended and enjoyed by both those who participate and those who attend to look on. A hospital chorus is being developed under the direction of a skilled chorus leader who gives instruction on Monday and Thursday evenings and much enthusiasm is shown and those who participate are benefited. On Declaration and Labor Day, field day celebrations are held. During the summer baseball, tennis, volley ball, croquet, basket ball, and archery have been popular under the supervision of physical directors. Parties, picnics, corn roasts, and similar recreations are provided for patients who are in suitable condition to enjoy them. Additional radio sets have been installed on the wards and now number seven. The Auxiliaries of the American Legion of Westborough, Marlborough, Hopedale, Milford, Grafton, Upton and Uxbridge have visited the hospital and have brought with them entertainments and refreshments to ex-service patients, and representatives of the K. of C. have visited from time to time bringing candy, tobacco, games, etc. Christmas week was one of much activity and pleasure.

PATIENTS' LIBRARY

Many additions have been made to the library by purchase and donation and include 114 volumes of fiction and 39 of biography, history, travel, etc. The circulation of the library increases constantly and a large number of subscriptions to magazines are circulated and bring pleasure to many. The number of phonograph records has been increased greatly, these being distributed and exchanged at the library. We extend our thanks to: Miss Elizabeth Barlow, Miss Alice Christman, Mrs. R. L. DeArmond, Mr. Horace H. Easterbrook, Mr. Merrill French, Mr. and Mrs. H. P. Kidder, Miss Mary E. Ledger, Mrs. David Malony, Miss C. P. G. Nelson, Mrs. Mary S. Nightingale, Mrs. Lena Perkins, Mrs. Elizabeth Richmond, Dr. John Rockwell, Mrs. Marion Tewksbury, Miss Hattie A. Thayer, Mrs. E. G. Towne, Dr. Leslie Vinal, Mr. M. H. Walker, and Dr. E. C. Yerbury for their generosity in making donations to the library.

SOCIAL SERVICE DEPARTMENT

Considering the fact that there has been but one worker in the Social Service Department during the year whereas two are authorized and more actually needed, the amount of work done and good accomplished has been great. Intensive social case work has been done in special cases; investigations and the obtaining of histories has taken much time; supervision of patients on visit, those in family care, those for whom employment was obtained and attendance at clinics has kept the social worker very busily occupied. The following are the statistics of the department: histories and investigations 40; persons supervised in the community including family care 140; patients placed in the community 18; visits to patients on the wards 60; visits to patients in the community 130; to relatives, friends and acquaintances 401; to social agencies concerning patients 140; personal services to patients 60; clinics attended 75; patients interviewed at clinics 112; number of visits of patients to clinics 440; conferences attended 10.

OCCUPATIONAL THERAPY DEPARTMENT

The occupational therapy department continues to be a very valuable adjunct to the medical work of the Hospital. The work has been extended, there now

being nine ward classes in addition to those in the main occupational therapy room and the additional room adjacent to Ward 5. The following is a summary of the output of the department:

SEWING ROOM

The sewing room has been busy as usual and the three employees there employed and an average of 10 patients turned out the following large quantity of work:

Repaired: altar cloths 1; aprons 317; art squares 3; auto curtains 24; bags, laundry and mail, 1092; bathrobes 101; blankets 23; blankets, pack, 10; camisoles 1; coats, attendant's white duck, 274; coats, woolen, 49; collars 2; comforters 1; covers, painter's, 1; cushions 1; dresses 1601; flags 7; gloves 5 pairs; handkerchiefs 6; mattress ticks 3; nightgowns 578; nightshirts 280; overalls 33; pajamas 3; pillow cases 13; rugs 4; sheets 137; sheets, restraint, 10; shirts 435; slippers 506; socks, 230 pair; spreads 22; stair pads 17; stretcher covers 2; surgeons' gowns 20; sweaters 52; table cloths 9; towels 21; trousers 97; trousers, white, 32; underwear 235; uniforms, white, 5; vests 13.

Made: aprons 620; aprons, rubber 2; articles tagged 3586; bags, coffee, individual and laundry, 285; bandages 3; blankets, strong and pack, 11; bread cloths 4; covers, sandbag, extractor and dental, 15; curtains 8; dresses, gingham, 1392; dresses, heavy, 654; dusters 5; mattress ticks and covers 269; nightgowns 1782; nightshirts 593; oven cloths 23; pillow cases 62; pillow ticks 201; pot holders 20; shades 230; sheets 437; sheets, restraint, 12; shirts, outing, 717; slippers 910; spreads 4; surgeons' gowns 18; table cloths 69; table napkins 75; tray cloths 87; towels 6487.

DONATIONS

Many and liberal contributions were made to our Christmas and entertainment funds and our gratitude for their generosity is extended to: Miss Marian L. Baker, Mr. Joseph Baldassini, Mrs. Mildred C. Bedell, Mr. John F. Bowen, Mrs. Lizzie C. Bronson, Mr. Arthur G. Brown, Mrs. B. M. Brown, Mrs. Priscilla C. Brown, Miss Grace D. Bryant, Mr. William R. Burns, Miss Catherine T. Carey, Miss Harriet E. Chapin, Mr. Arthur Chapin, Mr. George A. Clerk, Miss M. E. Clark, Mrs. Ethel Cloues, Mr. John W. Clough, Mrs. Angie W. Coffin, Mr. M. P. Collins, Mrs. John Connors, Disabled Veterans Christmas Remembrance Committee, Mrs. Nellie M. Dodge, Mr. E. E. Eames, Mr. F. W. Faxon, Mr. Thomas J. Feeney, Mr. James E. Fielding, Mrs. E. P. Fitzpatrick, Mr. Louis J. Geoffrian, Mr. M. C. Goode, Mr. L. V. Grant, Miss Zillah G. Grant, Miss Winifred Greeley, Mrs. Minerva E. Green, Mr. Oscar Hackenson, Mr. S. L. Haines, Mr. John Hennessey, Mr. D. Hepburn, Mr. Edgar F. Hunt, Mr. Russell S. Hyde, Mrs. Emma Jackman, Mr. Edward C. Johnson, Mr. James B. Keene, Mr. Richard Lamb, Mrs. John Lawson, Mrs. Mary W. Levitt, Mr. George R. Locke, Mr. Patrick McBride, Mr. James A. McDermott, Mrs. J. McDonough, Miss Agnes Maglinchey, Mr. E. H. Maher, Mr. J. Maher, Mr. E. W. Marden, Mrs. Louise T. Marston, Mr. Martin A. Melanson, Mr. M. J. Meloche, Mr. J. Miller, Miss Mary Moran, Mr. Charles Mullen, Mr. Daniel C. Murphy, Mrs. Marion Nelson, Mr. Charles S. Norris, Mrs. Carl D. Ohman, Dr. Frederick B. Percy, Miss Anna Pierce, Mrs. Ida M. Prouty, Mrs. Mary Roche, Mr. John H. Rohan, Mr. C. Radford Sands, Mrs. Henry J. Schultz, Mr. Solomon Shur, Mr. A. J. Shartle, Mrs. Jennie Silva, Mrs. Alanson B. Stearns, Mr. Richard E. Stinson, Mrs. George Sullivan, Mrs. Julia Sullivan, Mrs. H. B. Stewart, Mrs. Lillian Bond Sweatt, Mrs. James Travers, Mr. F. J. Untersee, Mr. Arnold Vandenbosch, Mrs. Harriet Walker, Mr. Anthony Warfield, Mr. Louis Weiler, Mrs. T. Wickham, and the American Legion Auxiliaries of Boston, Hopedale and Uxbridge.

CONCLUSION

Much gratitude is due to all department heads and other employees for their loyal cooperation without which the success which we have had could not have been attained. I thank them all.

Members of the medical staff have been devoted to the interests of the patients in their charge and have labored long and loyally to maintain and improve the standards of care and treatment. To them I am grateful.

To the members of your Board, for your encouragement and support, I wish to express my appreciation.

WALTER E. LANG, M. D., *Superintendent.*

TREASURER'S REPORT

To the Department of Mental Diseases;

I respectfully submit the following report of the finances of this institution for the fiscal year ending November 30, 1926.

CASH ACCOUNT Receipts

<i>Income</i>	
Board of Patients.....	\$165,725.17
Personal Services:	
Reimbursement from Board of Retirement.....	146.81
Sales:	
Travel, Transportation and Office Expenses.....	\$48.19
Food.....	2,715.70
Clothing and Materials.....	82.04
Furnishings and Household Supplies.....	86.71
Medical and General Care.....	82.50
Farm:	
Cows and calves.....	\$125.00
Pigs and hogs.....	96.50
Hides.....	208.58
Sundries, milk.....	20.67
	450.75
Garage, Stable and Grounds.....	1.83
Repairs, Ordinary.....	236.47
Total Sales.....	\$3,704.19
Miscellaneous:	
Interest on bank balances.....	\$747.01
Rent.....	977.97
Sundries.....	\$1,724.98
Total Income.....	\$171,301.15

MAINTENANCE

Balance from previous year, brought forward.....	\$10,773.58
Appropriations, current year.....	544,500.00
Total.....	\$555,273.58
Expenses (as analyzed below).....	533,043.00
Balance reverting to Treasury of Commonwealth.....	\$22,230.58

Analysis of Expenses

Personal Services.....	\$247,445.89

Balance reverting to Treasury of the Commonwealth during year (mark item with *). \$14.58
 Balance carried to next year. \$46,163.75

Total as above. \$46,178.33

PER CAPITA

During the year the average number of inmates has been 1,376.888.

Total cost for maintenance, \$533,043.00.

Equal to a weekly per capita cost of \$7.445 (52 weeks to year)

Receipt from sales, \$3,704.19.

Equal to a weekly per capita of \$.052.

All other institution receipts, \$167,596.96.

Equal to a weekly per capita of \$2.341.

Net weekly per capita \$5.052.

Respectfully submitted,

CARRIE P. G. NELSON, *Treasurer.*

Total receipts and payments are in agreement with comptroller's books of accounts.

JAMES C. McCORMICK
